

I wish to have my voice heard regarding NAB'S petition 04-160. I believe the FCC should reject the petition. I enjoy my XM radio and its many different types of listening. I enjoy the weather reports, the high quality of music and the special stations for adult entertainment. I enjoy the fact that I receive the reception in parts of the country where other stations fail. I also enjoy the fact that I have my preferred stations selected and I can listen to any of those stations at the flip of a button. It's always crystal clear reception. I pay for this high quality service and I don't think the NAB should be able to tell me what I can't listen to. Please contact me if you require any additional information.
